

Department of Electronics and Communication Engineering  
Khulna University of Engineering & Technology  
Khulna - 9203, Tel: 041-769471 (191); Fax : 041-774403

## Biography

KUETdsfsdfsdf

**Dr. Md. Faruque Hossain**

Professor

**Research Area** Optoelectronics, Numerical Computation

## Education

### Doctor of Philosophy

City University of Hong Kong, Hong Kong (2010)

The Outstanding Academic Performance Award for Research Degree Students in the academic year 2008-09 . . Awarded "Research Tuition Scholarship" in the academic year 2009-10.

### Master of Science in Electrical and Electronic Engineering

Khulna University of Engineering & Technology, Bangladesh (2006)

### Bachelor of science in Electrical and Electronic Engineering

Khulna University of Engineering & Technology, Bangladesh (2002) Group: Electrical and Electronic Engg.,

## Service Records

- **Department/Section:** ECE  
**Course Coordinator for several academic years (UG and PG)** From 01-01-1970 to 01-01-1970
- **Department/Section:** ECE  
**Laboratory-in-Charge of various labs in different academic years** From 01-01-1970 to 01-01-1970
- **President, ECE Association, KUET** From 01-01-1970 to 01-01-1970
- **Member, CASR, KUET** From 01-01-1970 to 01-01-1970
- **Member, Academic Council, KUET** From 01-01-1970 to 01-01-1970

## Research Interest

### Optoelectronics, Numerical Computation

Integrated optical devices

Bio-photonics

Photonic and electronic packaging

FEM analysis

Numerical computation of electromagnetic fields

.

.

My expertise, particularly, covers:

• Processing of polymer materials (mixing, curing, photolithography, etc.) • Thin film characterization using AFM, Nanoindentation, Surface profiler and Prism coupler • Extensive FE analysis of thermo-mechanical stress in multilayer deposition of materials, curing, etching etc. including viscoelastic modeling. • Design of various polymer waveguides and Bragg grating considering thermo-mechanical effects, and their fabrication and characterization • FE modeling of microfluidic systems, MEMS structure and biological problems such as brain edema exploring COMSOL • Laser machining, 3D Bioplotter for microfluidic devices, scaffolds for tissue engineering
